

**AluminTechno**

is one of the leading European manufacturers of profiles, component parts, and drives for roller shutter systems manufacturers which incorporates several manufacturing enterprises and sales companies.

High-performance manufacturing technologies are utilized at ALUTECH manufacturing enterprises including roll forming lines, bending presses, foundry shops, aluminum extrusion lines, automated aluminum alloy casting complexes, powder coating lines, aluminum profiles anodizing complexes.

Advanced manufacturing lines and skilled staff provide highly competitive products manufacturing which correspond to the strict European quality and safety standards.

Quality and environmental friendliness of the used raw materials are evidenced by international certificates.

High engineering, development, manufacturing, mounting and service quality is evidenced by conformity certificate ISO 9001:2008

**W72**  
Thermally broken windows and doors system

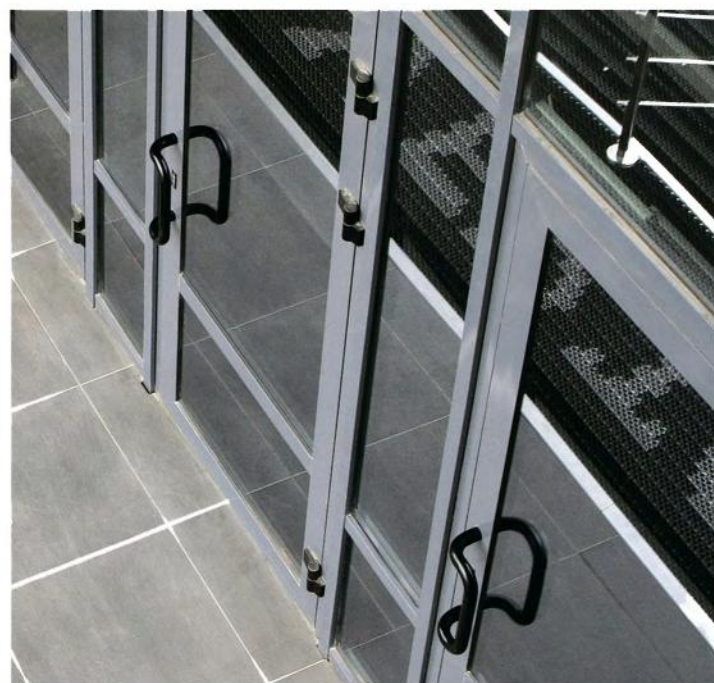

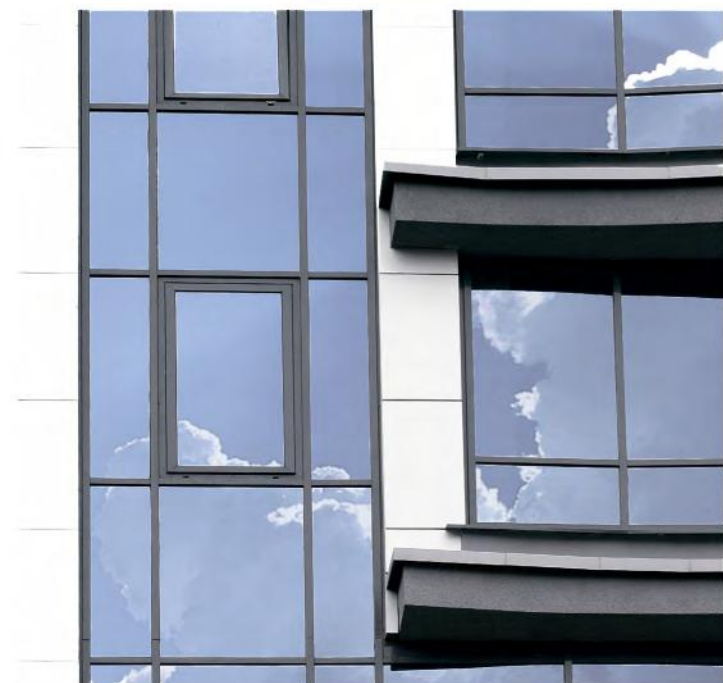

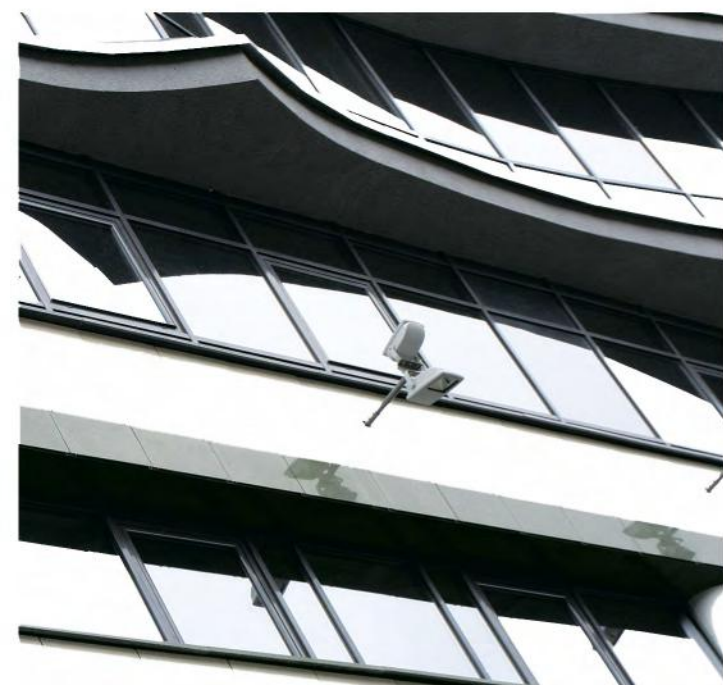

A full-function system which allows manufacturing of different constructions

Highly effective thermal insulators provide high thermal resistance

## MULTIFUNCTIONAL SYSTEM WITH THE INCREASED THERMAL INSULATING PROPERTIES

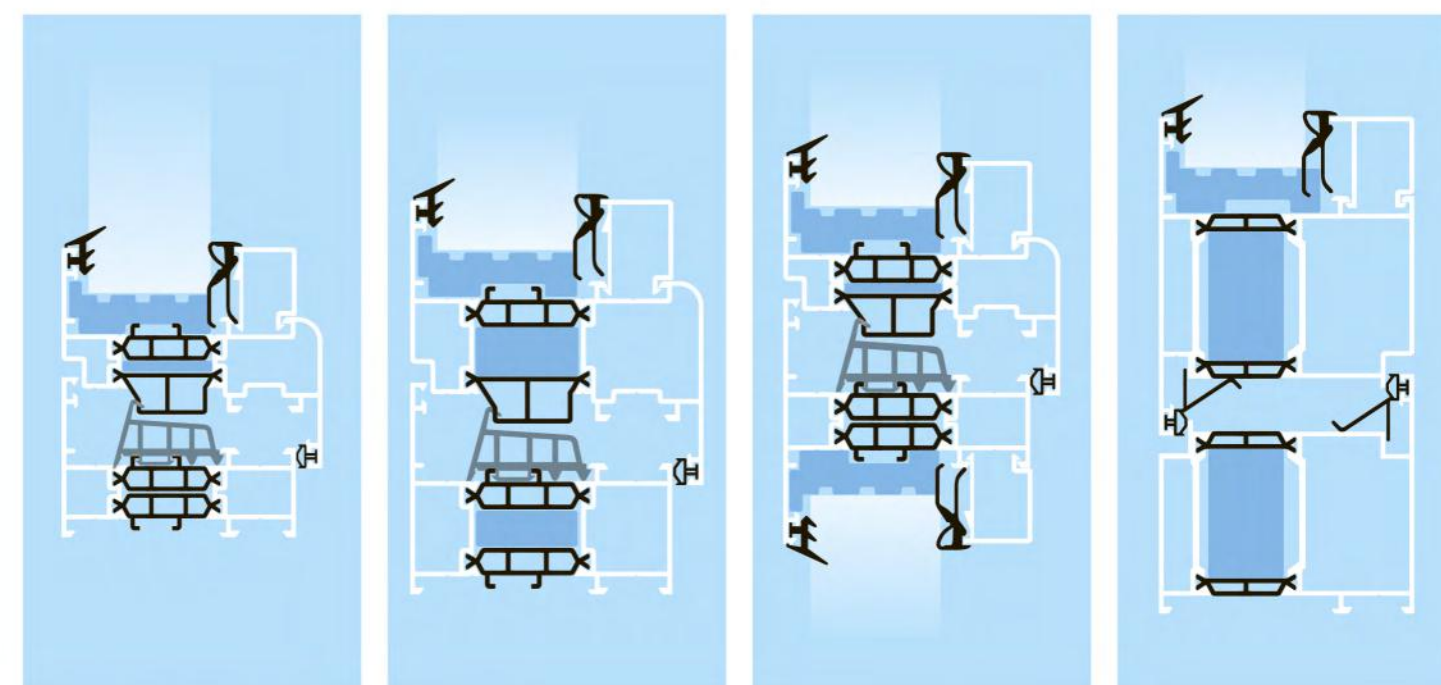

- designed for constructions manufacturing in modern energy-efficient buildings
- doors and windows constructions
- high sound proof level
- strength and stability suitable for big structures

- Hinged and Tilt-and-Turn windows
- French windows
- Continuous glazing
- Integrated in facade windows

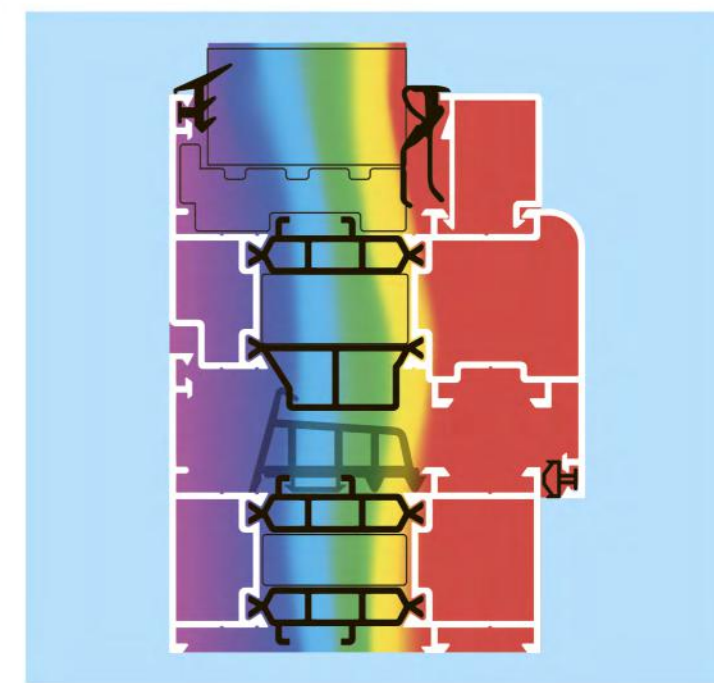

- One sash doors
- Double sash doors
- French doors
- Integrated in facade doors

## DIFFERENT WINDOWS AND DOORS ASSEMBLY SOLUTIONS

### GLAZING SYSTEM WITH THE INCREASED THERMAL INSULATION W72

Material group of the frame 1,0 DIN 4108-4  
Filling - 1-3/8"

- Advanced design methods
- Modern materials
- Advanced technologies
- Reliable construction
